HORNET'S NEST INSTALLATION INSTRUCTIONS

1. Remove the drain grate and unfold the Hornet's Nest and place it centered and into the storm drain you wish to protect. Make sure the high visibility straps are facing up.

2. Place the grate back into the storm drain and while doing so, pull each of the four ends of the high visibility straps up through the grate openings.

3. Take the carabiner from one of the high visibility straps and pull it through the loop of the other end of that same strap. Pull it tightly and attach the carabiner to the grate. Repeat for the other strap.

4. Trim excess materials for a safer and tidier install.
